Phone : +81 90-8281-3661

Birthday : 6 November, 2000

Location : Tokyo, Japan

CAREER SUMMARY

Expert in **Computer Vision**, **LLMs** and **RAG architecture** with a focus on building scalable, production-ready AI solutions on **Azure**. Proven track record of optimizing inference pipelines to **reduce latency by 70% and production costs by 50%**. Experienced in leading cross-functional teams to deliver automated data processing and real-time analytics that drive operational efficiency in professional environments.

SKILLS

Languages:	Python (Advanced), C/C++, SQL
AI & ML Core:	PyTorch, TensorFlow, Scikit-learn, LangChain, Hugging Face, RAG
Computer Vision:	OpenCV, YOLO, MMAAction2, ByteTrack, MoveNet
Cloud & DevOps:	Azure (Databricks, DevOps), Docker, CI/CD
Version Control:	git, GitHub
Databases	Azure SQL, MySql, MongoDB, Pinecone (Vector), ChromaDB
Visualization	Power BI
Mobile Development	Flutter, Firebase firestore
Operating Systems	Linux, Windows, Mac

LANGUAGES

Japanese – Conversational (Learning N3)

English – Business Level (Professional Fluency)

Bangla – Native

PROFESSIONAL EXPERIENCES

Data Scientist | Oct, 2024 – Oct, 2025

Othello Financial Services Co. Ltd.

- Designed and deployed computer vision models with the AGiFT AI Camera team to extract actionable insights from visual data, improving product quality.
- Designed and implemented real-time customer behavior analytics systems to reduce processing latency by 70%, enabling faster business intelligence.
- Led development of automated NFT video generation systems, reducing production cost by 50% and removing human intervention for NFT creation.
- Integrated IoT devices for automated retail data collection for real-time data gathering for analytics.

AI Engineer | Feb 2024 – Jul 2024

Bangladesh Govt. Project (Contractual)

- Developed a RAG-based PC application for multilingual document and image search using OCR and NLP.
- Led a 3-member team and delivered the full product life-cycle, from design to final deployment.

KEY PROJECTS

Duration	Projects and Tasks	Technologies Used	Role & Project Size
Jul 2025 – Oct 2025	【Project】 Universal NFT Generation Platform - Extended a sports NFT system to handle user generated video content across festivals, concerts and other domains. - Fine-tuned action detection models and prepared the pipeline for automated NFT clip creation	Python, MMAction2, OpenCV, MoviePy, Azure DevOps, Git	Role: AI engineer (Implementation lead) Team: 3 members
Sept 2025	【Project】 Customer Support Chatbot - Built and deployed a RAG-based chatbot capable of retrieving and generating accurate, context-aware responses to user queries.	Flask, Langchain, Pinecone, GPT-4, Microsoft Azure	Solo Developer
Feb 2025 – Jul 2025	【Project】 Sports NFT Generation System - Trained a custom object detection model and built a real-time video processing pipeline for automatic NFT creation from key moments in sports games. - Achieved 90% accuracy, cutting production time and cost by 50%.	Python, YOLO, ByteTrack, OpenCV, MoviePy, Azure DevOps, Git	Role: AI Engineer Team: 3 members
Oct 2024 – Jan 2025	【Project】 Real-Time In-Store Behavior Analytics System - Designed and implemented a real-time system to detect customer groups and product interest. - Applied parallel processing, reducing latency by ~70% for faster business intelligence.	Python, MoveNet, OPTICS, SQL, Azure Databricks, Power BI, Git	Role: System Developer Team: 3 members
Feb 2024 – Jul 2024	【Project】 Context Searcher - Designed and implemented a RAG-based PC application for keyword and context search across PDF, DOCX, XLSX, TXT, and images (Bengali/English) using OCR and NLP. - Led full-cycle product development.	Python, OCR, LangChain, OpenAI Embedding, ChromaDB, PyQt, MongoDB	Role: AI Engineer & Team Lead Team: 3 members

EDUCATION

Bachelor of Science in Computer Science & Engineering | Jan 2019 - May 2024
Comilla University, Bangladesh
CGPA: 3.4/4.0

CERTIFICATIONS

2022 – Skill Development for Mobile Game & Application Development (Flutter)
ICT Division, Bangladesh
